FlashDoctors pre-beta installation instructions:
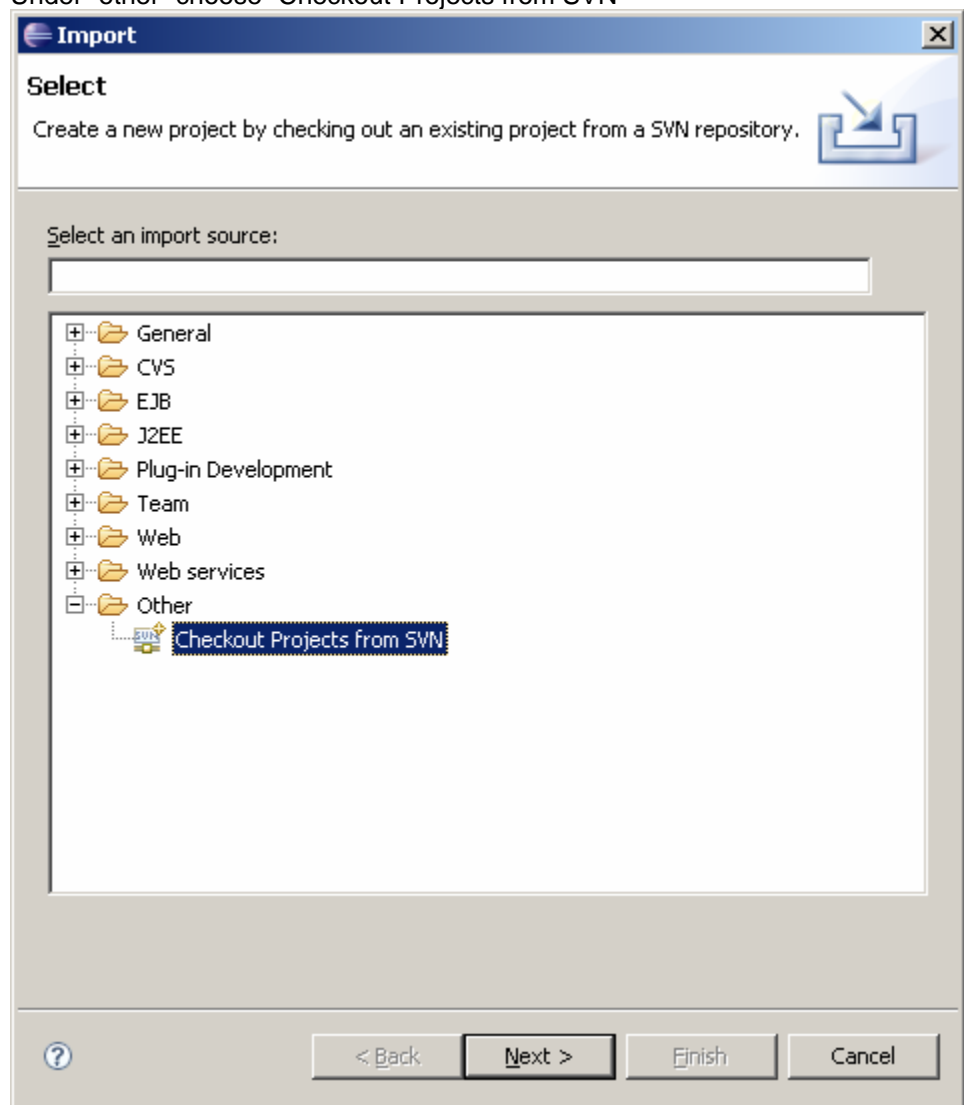

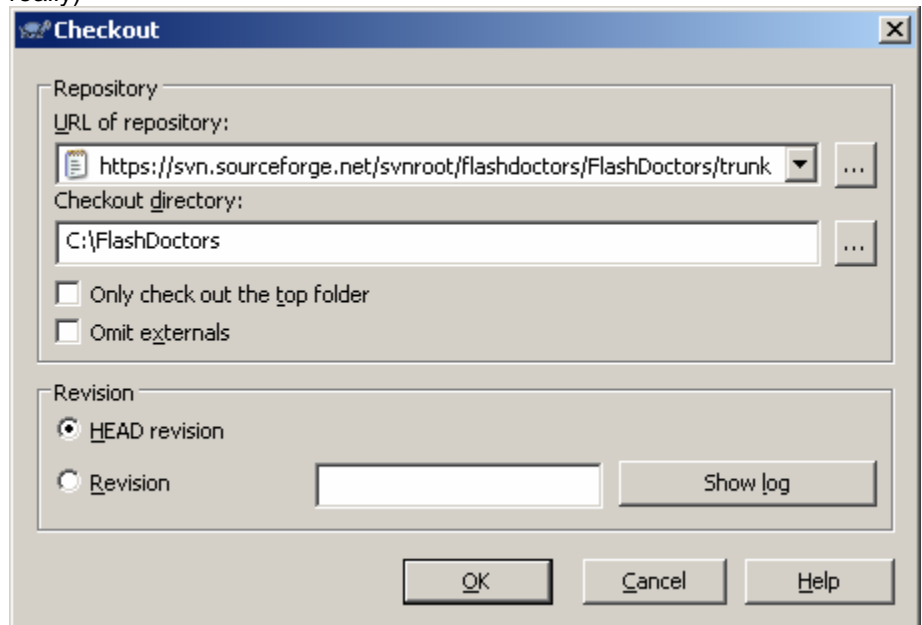

1) Download a subversion (SVN) client if you don't already have one
   a. If you're using eclipse as your IDE, try subclipse: http://subclipse.tigris.org/
   b. If you're not, try TortoiseSVN: http://tortoisesvn.tigris.org/
   c. For more information on subversion itself, see here: http://svnbook.red-bean.com/
2) Install the client you just downloaded, following instructions & restarting your computer or eclipse as required
3) Check out FlashDoctors using your SVN client
   a. If you're using subclispe
      i. Start Eclipse
      ii. Choose "Import" from the file menu
      iii. Under "other" choose "Checkout Projects from SVN"

      iv. Click next
      v. Choose "create a new repository location"
      vi. Click next

vii. Enter this in the URL field:
https://svn.sourceforge.net/svnroot/flashdoctors/FlashDoctors
viii. Click next
ix. Wait for subclipse to show you a list of folders
x. Choose "trunk"
xi. Click next
xii. Choose "checkout as a project in the workspace"
xiii. Project name: "FlashDoctors"
xiv. Click finish
xv. You now have FlashDoctors
xvi. Periodically (each week or so), you should make sure you have the latest version, to do this, right click on project folder and choose "Team", then "Update"

b. If you're using TortoiseSVN
    i. Right click on your desktop (or the empty space in any windows explorer window)
    ii. You should see an option called "SVN Checkout…" – choose it
        1. If you do not see this, please read the user guide for TortoiseSVN and try again.
    iii. Configure your checkout
        1. URL of repository The repository URL:
        https://svn.sourceforge.net/svnroot/flashdoctors/FlashDoctors/trunk
        2. Checkout Directory: **C:\FlashDoctors** (or anything you like really)

    iv. Click OK
    v. You should see TortoiseSVN copy down all the files to the directory you specified.
    vi. You now have FlashDoctors
    vii. Periodically (each week or so), you should make sure you have the latest version, to do this, right click on the directory you specified and choose "SVN Update".

4) Now that you have FlashDoctors:

a. Open the docs directory and read:
   i. SyringeUserGuide.html and DoseUserGuide.html
b. Open docs/examples
   i. Unzip Example1.zip to a directory of your choosing
   ii. Open Example1.fla
   iii. Adjust the classpaths
      1. you should have 2 class paths specified:
      2. point to FlashDoctors/src (c:\FlashDoctors\src)
      3. the "src" directory in the Example1 folder (src)
      4. If you unzipped Example1 into the examples directory, you can also get by with this:

   iv. Preview your file. You should see a set of four buttons, and a grey box.
   v. View the docs & config file together
      1. Open the docs: Example1/html_docs/index.html (Uses JavaScript, so in IE you have to "allow blocked content")
         a. Spin down "Example 1"
         b. Click on "Example 1 Class Diagram" to view the class diagram
         c. Spin down com, then flashdoctors, then exampleapp1 and click on each class to view information about it.
            i. You might want to go in this order:
               1. Shell
               2. Application
               3. HistoryPanel
               4. IColorable
               5. ColoredBox
               6. TextButton
               7. ColorChangeCommand
               8. ColorChangeEvent
      2. Open Example1/config.xml
   vi. Contact the mailing list with questions/comments/etc.
      1. flashdoctors-general@lists.sourceforge.net
   vii. Submit bugs here
      1. http://sourceforge.net/tracker/?group_id=172392&atid=861553
   viii. And feature requests here
